

2002.0 - Census of Population and Housing: Indigenous Profiles, 2001

Previous ISSUE Released at 11:30 AM (CANBERRA TIME) 10/08/2005

Summary

Main Features

ABOUT THIS RELEASE

The Indigenous Profile (IP) contains 29 Excel formatted tables that provide key census characteristics of Aboriginal and Torres Strait Islander persons, families and dwellings. Some tables provide comparisons with the non-Indigenous population.

The Census continues to be one of the most important sources of statistical information about Indigenous people, and the results are used extensively by Indigenous communities, organisations and government.

All tables within this profile are available for the following geographical levels: ATSI Region, Indigenous Areas, Remoteness Areas, Local Government Areas (LGA), Statistical Subdivisions (SSD), Statistical Divisions (SD), Statistical Districts, States/Territories and Australia. Only Tables I01, I02, I03, I13 and I29 are available at SLA and Indigenous Location level due to small population size. All Indigenous Profiles are available free.

INDIGENOUS PROFILE SELECTION

Indigenous Profiles are accessible as part of the Community Profiles Series. [Access 2001 Community Profiles Series](#)

About this release

ABOUT THIS RELEASE

Community Profiles are a set of standard tables which contain key social, demographic and economic characteristics of people, families and dwellings. The Profiles, which form the core of many Census products, are available for Australian Standard Geographic Classification (ASGC) areas and other standard Census geographic areas. They are an economical way of obtaining a statistical picture of a community and making comparisons between different areas or different population groups - an excellent tool for research and planning.

The Community Profile Series will be available in hardcopy or electronically with a selected range of tables available via the Internet. Electronic versions of the Community Profiles will continue to be provided with free windows-based manipulation software which allows users to view, select and print data. It is anticipated that 2001 Census Profiles will be available in formats suitable for use with a range of spreadsheets and databases.

The Series comprise:

- Basic Community Profile
- Indigenous Profile
- Time Series Profile
- Usual Residents Profile
- Expanded Community Profile
- Working Population Profile

The Indigenous Profile (IP) will be released in two stages and contain 29 tables reflecting the key characteristics of persons, families and dwellings. Comparisons with the non-Indigenous population are provided for the majority of tables. The IP will be available for Indigenous geography, with some tables available for Indigenous Locations, and others available for Indigenous Areas, Aboriginal and Torres Strait Islander Commission (ATSI) Regions. It will also be available for Main ASGC geography comprising Statistical Local Areas and their aggregates.
